

ASTRA

LED Cabinet Light

Description

Introducing the ASTRA LED cabinet lighting series. The ASTRA is an alternative to the traditional halogen light sources. The ASTRA features a high output 3W COB LED to offer superior performance and light over the working area whilst only consuming a total 3.6W of energy. The ASTRA offers two mounting options to cover a wide range of applications. These include recessed mounting or surface mounting. Smooth even lighting is provided from a single light point and frosted lens.

Specification Features
