

DEKA Brass Inground Light

Description

The DEKA luminaire provides a practical solution for all inground lighting applications including pathways, driveways, courtyards and decks. Utilising a solid brass CNC machined external fascia plate and a 6063 graded aluminium in a black anodised finish.

The DEKA recessed inground luminaire in solid brass finish will age with time. This is a natural process which adds to the overall appeal of the fixture. A polycarbonate housing is provided for concrete applications. For installations in which do not require the polycarbonate housing such as timber decks the stainless steel spring clips offer a secure fit. Idea applications would also include up lighting trees, feature garden wall, external house fascia etc.
